

Yi's SOULTIONS: AUTOPILOT PROFILE

When customizing an Autopilot profile, you should learn to set up controls to resolve issues with your profile.

Summary

Chapter 1 Autopilot profile

Table of contents

Chapter 1	Autopilot profile	Page 2
A.	Understanding existing configuration files	Page 2
1.	View	Page 2
2.	Custom Modifications	Page 2
B.	Comparison of autonomous driving configuration files	Page 2
1.	View the Autopilot Configuration File	Page 2
2.	Detailed comparison of configuration files	Page 26

Chapter 1 Autopilot profile

A. Understanding existing configuration files

1. View

Open the directory: {drive letter}:\YiSolutions_Encapsulation_Autopilot\Microsoft Windows 11\24H2, for example, view: 1.zh-CN.json, 2.zh-TW.json, 3.zh-CN.zh-TW.json, 5.zh-CN.zh-TW.ja-JP.Ko-KR.json, All.json

2. Custom Modifications

Custom modifications use the packaged script update function. After the update is completed, the old autonomous driving configuration file will be overwritten. It is recommended that you copy it before operation.

Open the directory: {compressed package}:\YiSolutions_Encapsulation_Autopilot\Microsoft Windows 11, select copy 24H2, and rename the directory to 24H2_Beta or rename it to another name.

B. Comparison of autonomous driving configuration files

1. View the Autopilot Configuration File

Open: {compressed package}:\YiSolutions_Encapsulation_Autopilot\Microsoft Windows 11\24H2\1.zh-CN.json, configuration file content:

```

When there is a task

When does it begin

Solution, select the following nodes, acceptable values: Custom = Custom, Instantly = Immediate

Solution node: Execute immediately

Solution Node: Custom

Day

Hour

Minute

When finished, acceptable values: NoProcess = Do not process, Pause = Pause, Reboot = Restart
